

RISK ADVISORY

SECURELINK

Awareness & Training

SAT Assessment

Our Security Awareness & Training assessments cover cyber skills assessment of your employees, IT staff and cybersecurity roles to ensure that they have the necessary skills and training to tackle the threats that are relevant in your environment. Our services cover detailed role-based skills assessments to general phishing simulations and surveys across your environment. This also includes social engineering exercises that cover physical, telephone/SMS based phishing.

Cyber Range

Our cyber range features intentionally vulnerable applications and websites that tempt players to steal money, find out their boss's salary, purchase costly items for free, and conduct other nefarious acts. Hundreds of vulnerabilities, common to most business applications, lay waiting to be exposed.

E-Learning Platform (AppSec, General Awareness)

Our Information Security Awareness program takes an interactive and engaging approach to help employees recognize the value of different types of sensitive information and drive the behavioral change needed to protect it. Our general awareness program is designed for staff in roles such as human resources, legal, marketing, finance, sales, operations and customer service. We have an extensive App Security catalog of over 200 courses designed specifically for developers, testers, architects, database and application administrators and cyber security personnel.

Training

We offer Instructor-Led Training over a wide range of topics ranging from general security awareness to core application security. We can help you achieve your certification goals by training you on certifications like CISSP, CEH, ISO 27001 LA/I etc. carried out by experienced trainers with several years of consulting and implementation experience across their relevant fields.

Digital Campaigns

We create highly effective digital campaigns that can be run across various platforms such as social media, emailers etc. Our print campaigns have been successful in building a culture of cybersecurity awareness within various organizations. We can create customised training content in the form of 2D/3D videos; these security awareness videos can depict the daily workings of an organization and can be used to improve the understanding of information management throughout the organization.

Strategic Consulting

Enterprise Security Architecture

We view security as an important pillar of your business. Your security strategy must align with your organizational goals and objectives. We view Enterprise Security Architecture as subset of Enterprise Architecture and therefore support our customers in both these engagements. Our EA/ESA programs are an essential component of your digital transformation journey.

Data Security

Data is the lifeblood of any organization and the security function is built around the sensitivity and criticality of data. Our Data security programs cover identification of structured and unstructured data including PII, Data classification, data governance, data modelling across the organization. It is essential for an organization to know what sort of data it processes to ensure that optimal level of controls are applied.

Regulatory Compliance & Assurance

The need for organizations to measure and report on regulatory compliance is growing; and we assist customers in implementing necessary measures across regulatory requirements issued by NESA/SIA, ADSIC, GDPR, DFSA, ISR, ECC, SAMA and QCERT. In addition to these we also assist customers on bespoke engagements that maybe industry or region specific.

Management Systems

A management system is a framework of policies, processes and procedures used to ensure that an organization can fulfil all tasks required to achieve its objectives. We help organizations in the implementation of management systems based on ISO 27001:2013, ISO 20000:2011 and ISO 22301:2012.

Identity & Access Management

Identity and access management plays a crucial role in securing an organizations' information and assets. We adopt an integrated approach identity and access management and develop customized IAM frameworks that not only provide a roadmap for prioritizing specific areas to reduce risks but also are scalable for your evolving business requirements.

Technology Consulting

Cloud Security

Moving to the cloud requires a robust cloud strategy with effective security controls. We can help assess/develop your cloud strategy or evaluate your current or prospective cloud service provider to ensure compliance with regulatory/sector specific requirements. Our cloud security services include providing continuous compliance monitoring of your cloud environments or point in time assessments.

Synack - Crowdsourced Testing

Synack allows you to harness the power of a private, global network of the industry's most sought-after security talent to diversify an organizations' scope and scalability for security testing. The SRT (SYNACK RED TEAM), a global force of highly-vetted, trusted, and diverse security experts, leverages Hydra AI to gain a contextual advantage and empowers them to find exploits more efficiently and with better coverage.

Security Assessments

Our expert security researchers conduct extensive and perpetual attacks on your IT Application in infrastructure. With the sole purpose of identifying means by which data can be stolen or your infrastructure taken offline. We provide assessments across your entire Digital Landscape covering web, mobile, IOT and wired/wireless Infrastructure. We simulate red teams attacking live systems and processes so that the business can better understand its detection and remediation capabilities in light of an actual attack.

Security Innovation (App Sec)

Security Innovation is a premier Software Security company with established centers of excellence in Web, Mobile, Infrastructure, Cloud, IOT, Embedded systems, BlockChain, Fintech and DevSecOps. They cover SDLC consulting, App Architecture & Code Reviews, trainings and simulations across a clients infrastructure.

IR & Forensics

Our Incident response services help organizations prepare for, manage, and recover from data breaches and cyber-attacks. Strengthen your cyber security program with assessments, threat hunting, and tabletop exercises from SecureLink. We provide consulting services on establishing SOC / SMCs, IR Playbooks & SOC maturity assessments.
